LR-RFID-F

Ligature Resistant Flush Card Reader

Safety housing for access control RFID devices. Designed for use in high security areas in healthcare facilities, correctional institutions, schools or anywhere that ligature points could be a concern.

Can be furnished with HID Prox PROXPOINT Plus Mini Mullion Reader Model: 6005BBB00 or as the housing with no electronics. Contact us if you require a custom furnished solution.

Height:	4 1/2"
Width:	3"

Robust Construction: Made from high-quality stainless steel and tough impact-resistant plastic, our readers provide long-lasting reliability.

Ligature Resistant Design: Prioritizing safety, our RFID card readers are designed to prevent accidental or intentional self harm, minimizing the risk of ligatures in any environment.

Controlled Access: Manage and control entry to rooms and areas easily. The LR-RFID ensures only authorized personnel gain access, its design prevents tampering and unauthorized entry, enhancing overall security.

Sealed Design for Outdoor Use: With its sealed design, our card reader is suitable for wet and outdoor locations. This feature enhances its versatility, making it an ideal solution for a variety of environments.

Easy Integration: Seamlessly integrate our card reader into your existing access control system, ensuring a smooth and efficient operation.

Versatile Applications: Suitable for various environments, including healthcare facilities, correctional institutions, and other high-security areas where safety is paramount.
