**Ligature Resistant Faucet**

**The Ligature Resistant Faucet** is designed and developed to retrofit existing lavatories or it can be specified for new design. The Ligature Resistant Faucet is arranged to be mounted to the deck of the lavatory. Faucet assembly requires (3) 1-5/16" to 1-1/2" diameter holes on 6" or 8" centerset. Conical Faucet body is chrome plated brass, includes a multi-stream, non-aerated spray nozzle insert and provides vandal and Ligature Resistance.

**Valve** is an Air-Control pneumatically operated, pushbutton valve using atmospheric air. Hemispherical pushbuttons are vandal-resistant and require less than 5 pounds of force to activate valve. Valve is metering with non-hold open feature. Metering valve timing range is 0-60 seconds. Valve can be remotely located up to 10 feet from the operating pushbutton.

**Optional -WHST70-12** Mixing Valve is ASSE 1070 compliant and delivers tempered water flow by compensating for pressure and temperature fluctuations. Valve is to be field set to 105 Fahrenheit and includes

strainers and integral checks. Operating range is 30 to 100 psi.

**Fixture is ADA Compliant.** Unit conforms with ADA requirements for accessibility when installed correctly. Compliance is subject to the interpretation and requirements of the local code authority.

**GUIDE SPECIFICATION**

Provide and install Ligature Resistant Faucet Components (specify model number and options). Faucet valve shall be Air-Control, metering, non-hold open type. Assembly shall include 0.35 GPM flow control, hot and cold hemispherical pushbuttons, pushbutton sleeve and faucet connections.
