### SUGGESTED SPECIFICATIONS

Model A0000000-FRA1 is an above ground freeze resistant valve system for use with specially equipped wall mounted fountains with a push-button pneumatically actuated valve. The unit is to be installed on the inside wall where the room temperature does not drop below 50°F. When the valve goes to the off position, the water left in the supply line and bubbler drains back into the waste tube, inside the cabinet. This permits the fountain on the outside wall to function year-round. Unit shall adhere to NSF/ANSI 61, Section 9.
