

Ligature-Resistant Safety Products
CAPE COD SYSTEMS CORPORATION
SP-12A and SP-12B Diverter Valve

The SP-12 diverter valve is available with two different styles of ligature resistant handles, designated “A” and “B”. The handles are recessed in an escutcheon plate to prevent capture of a line behind them. The valve has a non-rising stem, which means that no gap is created behind the handles when they are turned. The handles are broached for a secure, non-slip fit to the valve stem. The SP-12 is ADA compliant when used with the “B” handle.

The SP-12 can be used to operate both the SP-7 and SP-7WC in a single shower unit.

Specifications

- **Diverter Valve:**
 - *Material:* Brass body and stem
 - *Codes:* ASME A112.18.1 / CSA B125.1
 - *Operation:* Rotate handle clockwise or counterclockwise to direct water from one outlet to the other. *Not designed for use as a shut off!*
- **Trim:** 4” diameter, stainless steel
- **Handles:** (Type “A” and Type “B”)
 - *Material:* Cast aluminum
 - *Finish:* Silver polyurethane enamel with clear top coat
 - *Type “B”:* ADA compliant
- **Installation:** 1/2” copper inlet and two outlets. The handle screw is not included. www.capecodsystemscompany.com
