

## Tailor HD Lounge Chairs

### Heavy Duty Soft Seating

9101MHD

#### FEATURES:

- Frame: Fully welded 14 gauge steel with steel support stretchers
- Seat: 0.75" thick plywood structure with elastic webbing across the center adds suspension to the part of the seat most commonly interacted with, topped with high-resiliency molded foam. Seat upholstery is stapled into place along a disciplined edge, covered with a steel plate
- Seat Back: CNC cut plywood panels covered by high-resiliency foam creates comfortable upper back and lumbar support. Metal-to-metal connection between back and frame ensures longevity and stability
- Foam: Molded foam displaces 25% of non-renewable petroleum material with a sustainable plant based substitute without changing the physical properties, comfort, and longevity
- Arms: Plywood construction with spacer blocks made from polyamide; Option to attach polyurethane caps
- Foot: One-piece rotationally molded polyethylene
- Option to add roto-molded insert to bottom of chair for ligature resistance and to enclose the underside
- Option for one, two, and three seaters
- Flame Retardant (meets specifications for Federal Motor Vehicle Standard MVSS302 and CA Bulletin No. 117 (TB117-2013))

33H x 23W x 30D
