Ligature Resistant No-Caulk Shower Drain

Ligature Resistant Stainless Steel Strainer Grate and No-Caulk Brass Drain Body are designed for use with pre-formed Shower Stall Bases. The Strainer Grate is fabricated of 16 gauge type 304 Stainless Steel and is polished to a #4 satin finish. The Drain Body is sealed to the Shower Base with a Fiber and Rubber Washer. A 2" Schedule 40 DWV Pipe (by others) is secured with a mechanically compressed Gasket that does not require caulking.

The Strainer Grate is designed with Self-Clinching Vandal Resistant Screws and Eccentric Threaded Washers that fit into the Drain Body Snap Groove and secures the Strainer Grate to the Drain Body by compression. The Strainer Grate Extension helps reduce the risk of using the Strainer Grate as a Ligature point.
