

LIGATURE RESISTANT

Wall-Mounted Control Enclosures

Designed for Behavioral Health
& Institutional Facilities

Arsco Custom Metals is proud to offer ligature-resistant products engineered to prioritize safety while meeting Joint Commission Standards. Our solutions address critical safety concerns, including exposed thermostat and wall-mounted control products, damaged or inoperable enclosures, and enclosures with sharp edges or ligature points.

Key Features & Benefits

- **Patient Protection:** Designed to safeguard tenants and patients by eliminating tampering and ligature risks.
- **Enhanced Durability:** Extends the lifespan of thermostat and wall-mounted control systems by providing robust protection.
- **Effortless Maintenance:** Allows staff to access internal components easily for cleaning or servicing without compromising security.
- **Secure Staff Access:** Medical unit staff can adjust temperature or other controls through the tamper-proof, locking, removable panel, ensuring functionality without tenant access.

Advanced Design & Construction

Our enclosures set the standard for security and durability:

- **Removable, Locking Panel:** Each enclosure includes a fully removable, locking panel for secure maintenance access.
- **Clear Viewing Window:** Optional 3/8" polycarbonate (Lexan) viewing panel for strength and visibility.
- **Optimized Circulation:** Designed with a perforated layout to ensure accurate air temperature sensing and effective control.
- **Preserves Seal Integrity:** Maintenance access is designed to retain the integrity of the pick-proof caulking.

Compliance & Durability

Our enclosures comply with New York State OMH ligature-resistant specifications, ensuring tamper resistance, restricted access, and no ligature points. Built to withstand the harshest environments, each enclosure features:

- **Material:** 16-gauge cold-rolled steel for superior strength.
- **Finish:** Powder-coated with a low-gloss, matte white for durability and a professional appearance.
- **Maintenance Access:** With the use of one key, staff can remove the access panel to expose thermostat or other wall-mounted controls for cleaning or servicing. This process is completed seamlessly without disturbing the pick-proof caulking.

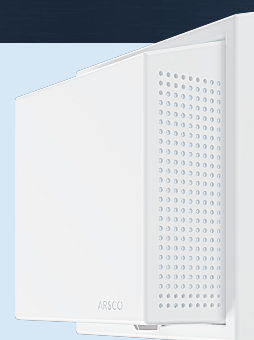

Turnkey Solutions

At Arsko, we deliver a seamless end-to-end experience, including measuring, design, fabrication, and installation, to meet your unique project requirements quickly and efficiently. All products are custom-made to order in the USA, ensuring the highest quality standards.

What We Offer:

- Custom project quotes available within **24 hours**.
- No mandatory measuring or installation services—flexibility to fit your needs.
- A **1-year warranty** covering materials and workmanship.

Solid Metal Front

Front and Side Viewing Panels

OFFERINGS & OPTIONS

- Customizable configurations to accommodate any control size.
- Designed to integrate seamlessly with all types of adjacent installations or workspaces.
