Stainless Steel Shower Seat**

Model WH1103-27-EG10
Model WH1103-33-EG10

Division of
Acorn Engineering Company®

A MEMBER OF

WH1103-33-FM

Fixed Shower Seat is front mounted and engineered to reduce possible risk of the fixture being used as a ligature device.

Ligature resistant design is based upon overall dimensions for Rectangular Shower Seat as shown in ADA Guidelines [610.3; 610.3.1]. **Manufacturer makes no claims for ADA compliance due to fixed seat design.**

Seat construction is welded, seamless and fabricated from 14 gauge type 304 stainless steel with exposed surfaces finished in Enviro-Glaze® white powder coat (-EG10).

Seat width is offered in sizes to suit a variety of applications including Shower Stall depths of 30" and 36". Width's offered allow for side wall mounting with a 3" gap at entry and Seat abutted against rear Wall (to eliminate wedging risk).

Mounting utilizes a concealed heavy gauge S-Clip Mounting Bracket for hanging Seat at top and includes an exposed Lower Flange for attaching Seat to wall. Recommended Wall Mounting Hardware and Wall Anchors shall be 3/8" diameter and are provided by others to suit wall construction and meet minimum load ratings of 250 lbs. Exposed Fasteners should be vandal resistant design.

Recommended installation should include appropriate Security Caulk product to eliminate any voids or crevices which may serve as ligature point. Position of Seat within a corner with an adjacent Wall may present a ligature point where an object may be wedged.
