

Suicide Reduction Door – Production Order Worksheet

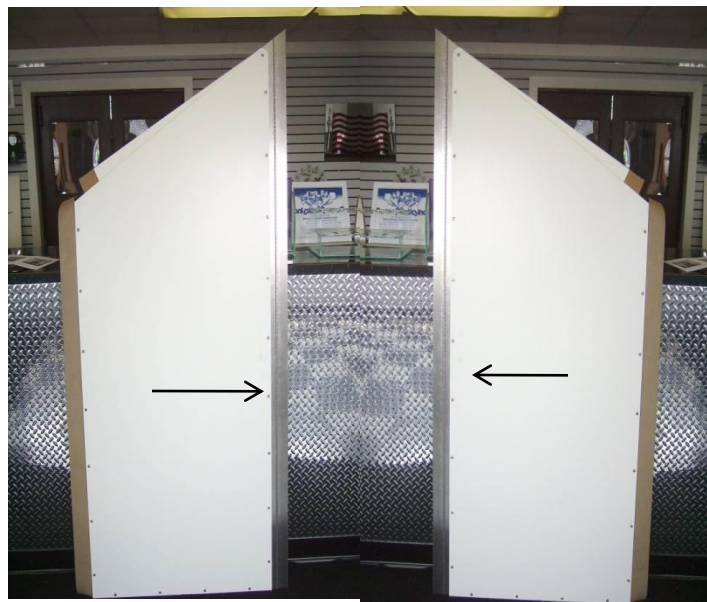

The Suicide Reduction Door is customized for every customer. In order to provide you the best possible product and expedite your order, please complete the questionnaire, sign-it, and fax it back to us ASAP so that we can start production of your doors. **Because the SRD door is custom-made to meet individual facility specifications, the door is non-refundable. Please measure carefully.**

If you will note, the SRD is hung in the center of the door frame (jamb) and not on the outside of the frame. It is hung 3" from the top of the jamb and 6" off the bottom. This is to ensure there are no hanging points. Once hung, the gasket should barely touch the door frame so nothing can be wedge on that side of the door.

1) What is the door frame I.D. size?

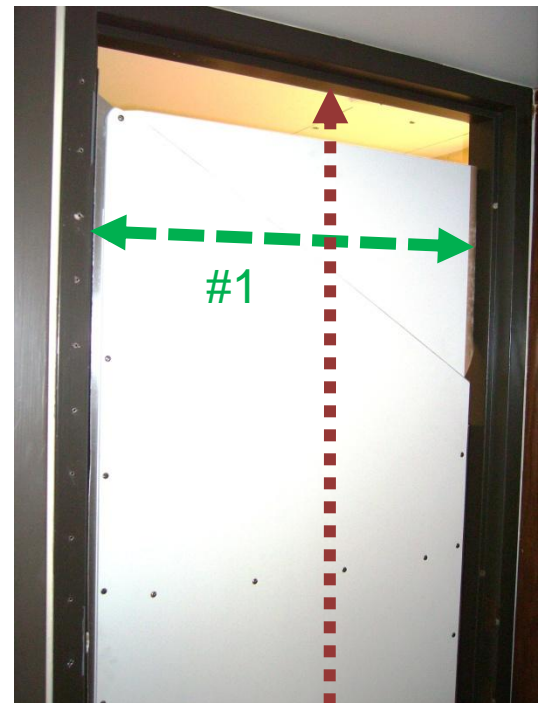

Width _____ Height _____

Refer to photos #1 & 1A. The measurements are taken from the center (i.e. door stop) of the door frame not where the door normally is seated.

Right Hinge

Left Hinge

2) View from outside of the bathroom looking into the bathroom. Where do you want the hinge on the SRD door?

Right Hinge Left Hinge
Qty. _____ Qty. _____

Door Version for production: #1 ___ or #2 ___

Approved for Production by:

Print Name: _____

Signature _____

Date: _____

Contact No: _____
