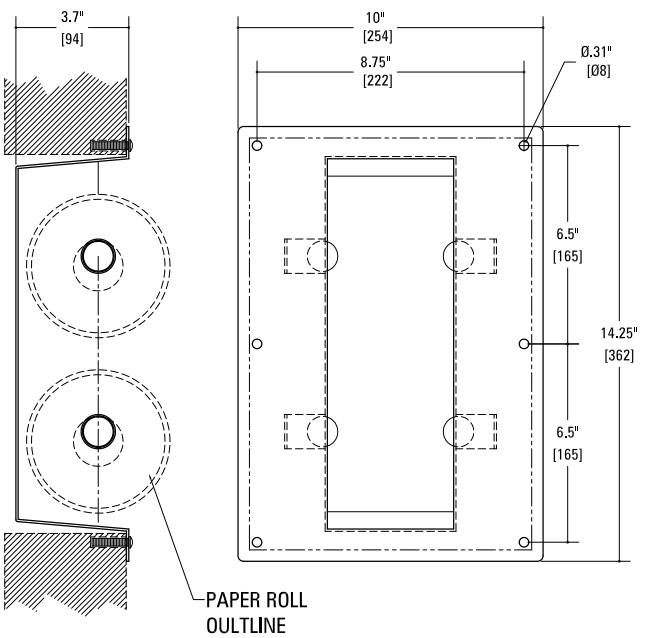
►DESCRIPTION/SPECIFICATION

The Metcraft Ligature Resistant tissue holders are designed to securely hold single rolls of toilet tissue with patent pending spring tensioned balls that will support the paper roll unless enough force is applied to overcome the spring tension. Holding tension is designed to release the paper roll to inhibit its use as a ligature tie point. Wall opening for the recessed portion of the fixture is 7"(178mm) x 12.375"(314mm). Six 5/16"(8mm) diameter holes on the front of the fixture are used to mount the front to the wall. Wall anchors provided by others.



Due to continuous product improvement Metcraft reserves the right to make changes in design and specifications without prior notice. All dimensions should be verified with the factory for current information.
