► DESCRIPTION/SPECIFICATION

The Metcraft Ligature Resistant tissue holders are designed to securely hold single rolls of toilet tissue with patent pending spring tensioned balls that will support the paper roll unless enough force is applied to overcome the spring tension. Holding tension is designed to release the paper roll to inhibit its use as a ligature tie point. Four 5/16"(8mm) diameter holes on the front of the fixture are used to mount the front to the wall. Stainless steel tamper resistant 1/4-20 mounting screws to attach the front cover to the body are provided. Wall anchors provided by others.
