

Contractor's Specification Sheet For

4 " Suicide Prevention Faucet

The suicide prevention 4" spread faucet is basically a Chicago meter type faucet that is encase in Corian material. It is designed so that a patient cannot tied anything to it and use it as a hanging point. The fixture sits on the top of sink and the rear of the faucet extends to either the backsplash or the wall. (See attachment)

802-V665CP –
4" Center Lavatory Faucet

The faucet is 8" wide, 3" high and approximately 8" long depending on the distance to the wall or backsplash. It weighs approximately 8 lbs and is attached to the sink by two threaded nuts around the water inlet pipes. The faucet can be cast in white, almond or several stone looking textures. The water duration can be set from 8-20 seconds.

Note :

To perform maintenance or change water duration , an "Allen" is inserted in the notch located near each push-handle.

Sample backsplash

To measure the radius curve, cut this scale from the page starting at the 2" radius scale mark.

Place the scale in the corner of your backsplash. If the 2" radius is too big, trim it down to the 1-3/4" scale. Repeat this process until the radius fits your backsplash's radius,

Note : Always start with the larger radius first and work to smaller scale.
