Ligature Resistant Floor Drains Stainless Steel Strainer and Grate

Ligature resistant floor drains are designed with an internal gusset system that helps prevent ligature points. Recommended for use in showers, bathrooms, kitchens and other areas where foot traffic is expected. The round top strainer head is used for all types of poured finished floors. The square top is particularly adaptable to floors that are finished in square or straight line patterns. Reversible flashing collar permits adjustment of strainer to meet finished floor level.
